## *Items Needed to Perform Updates and Program your SPMXCA200*

→ Desktop or Laptop computer running Windows 7 or higher
→ Micro USB to USB Cable (included with SPMXCA200)
→ Male to Male Servo lead (included with SPMXCA200)
→ Spektrum Smart ESC Programmer (SPMXCA200)
→ Battery to Power the ESC

## *Connecting your Spektrum Smart ESC to the SmartLink PC App*

1. Download the latest Spektrum SmartLink updater app here
2. Once downloaded, extract the .ZIP file to a location that you can easily find, we suggest the Desktop
3. Locate and open the Spektrum USB SmartLink application
4. You will see this screen →

5. Connect to your SPMXCA200 Programmer to your PC with the micro USB cable

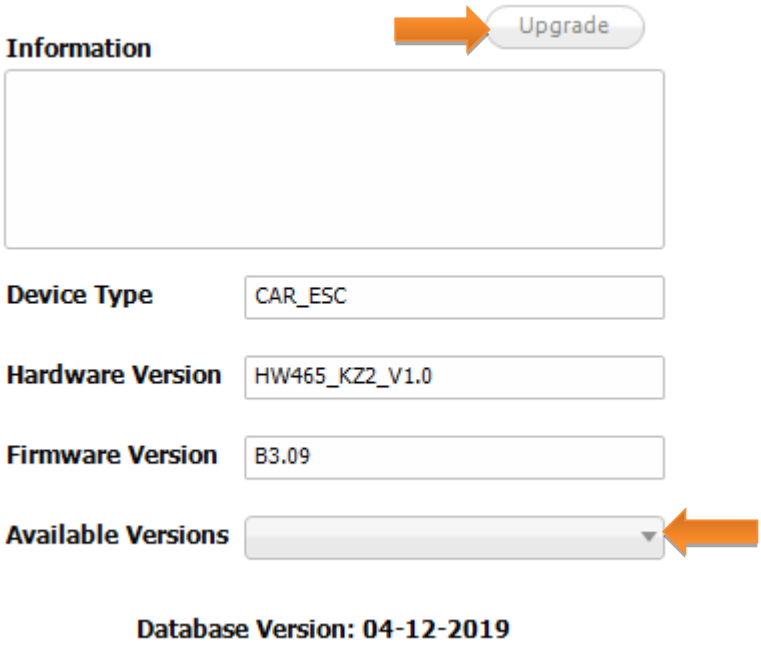

6. Click down on device and select the programmer.
7. The SmartLink app will connect to your programmer

## FIRMWARE UPGRADE

Updating your Smart ESC Programer is easy. Simply download the latest version of the SmartLink app, go to the Firmware Upgrade Tab and click ***Upgrade***.

Select the top version from the “Available Versions” drop down box then click the “Upgrade” button to perform the update

- Once the Upgrade button has been selected to install the update on your Smart ESC, a progress bar will appear on your computer screen. Please allow the update to finish then click OK to save the settings. You can disconnect and use your Smart ESC with the improved firmware now.
